EPAM Systems

Pune Division, Maharashtra, India

Re: Director, Delivery Management — Pune Division

Dear Hiring Team,

I am writing to apply for the Director, Delivery Management role in EPAM's Pune Division. As a Director at T-Systems ICT India with 22+ years in SAP delivery, I lead a 100+ person organisation across five countries managing a €8–10M SAP Application Operations portfolio, and the scope you describe — multi-million-dollar portfolios, global delivery, executive client relationships, automation-driven cost optimisation — maps directly to what I do today.

A few specifics that match your requirements:

• **Global portfolio ownership.** I currently own the full lifecycle of a global SAP Application Operations portfolio — delivery strategy, financial management, capacity planning, risk, compliance, FTE optimisation and CSAT — and have grown offshore delivery from scratch while maintaining customer satisfaction.

• **Measured efficiency lift.** Through automation, FTE pyramid correction and offshoring, I improved operational efficiency by 40% in my current role. I have partnered with McKinsey on organisational optimisation and cost reduction, so I am comfortable working alongside consulting teams as a peer.

• **Modern delivery stack.** Beyond core SAP (S/4HANA, RISE, Basis, Application Management), I actively use cloud platforms, observability tooling, and AI-driven automation in day-to-day operations — including a self-built AI agent stack (Hermes by Nous Research) for portfolio governance, with prompt caching, HMAC-signed webhooks and per-profile secret isolation.

• **Onshore-offshore model.** I have run 100+ resource teams across India, Europe and the US for global enterprise customers (Deutsche Telekom, McKinsey, T-Systems internal), and have personally driven the consulting-to-GCC migration pattern that EPAM's clients increasingly require.

• **SLA-driven managed services.** I have spent 14+ years running ITIL/SLA-bound AMS engagements with strict uptime, change-management and customer-success metrics.

I am certified in SAP HANA Database Administration, SAP Activate Project Management, PRINCE2 Agile (Foundation + Practitioner), PAL I, CSM, and NOVA Leadership Coaching. I would value the opportunity to discuss how I could contribute to EPAM's India delivery leadership.

Thank you for your time. I am available for a conversation at your convenience.

Sincerely,

Mayur Kachare
