Re: IT Director – Job ID 2438203

Dear Hiring Manager,

I am writing to express my interest in the IT Director position at Cummins (Job ID 2438203). With 22+ years of technology leadership spanning global SAP application operations, program governance, and large-scale IT delivery across 5 countries, I bring direct experience in the exact areas this role demands: strategic IT management, AOP/budget ownership, people development, and operational excellence at enterprise scale.

At T-Systems ICT India, I currently serve as Director - Application Operations - T-Systems ICT India Pvt Ltd, leading 100+ professionals across India, Germany, US, Mexico, and Malaysia. I own the end-to-end P&L for SAP operations portfolios valued at €8–10M annually — including AOP planning, budget forecasting, and financial performance management. My team governs complex SAP S/4HANA and RISE with SAP landscapes, driving 40% operational efficiency gains through automation, workforce optimization, and cloud transformation.

What directly aligns with your requirements:
- **AOP / Budget & IT Strategy**: Own annual operating plans and financial performance for multi-country SAP operations; contribute to technology roadmaps, capital planning, and IT strategy development for enterprise SAP/IT operations
- **People Management & Development**: Direct 100+ person global delivery organization with full performance management, coaching, onboarding, and workforce pyramid optimization across support, development, and platform teams
- **Operational Governance & KPIs**: Define delivery KPIs, operational governance models, service improvement initiatives, and executive reporting — ensuring SLA compliance, risk management, and continuous service improvement
- **Complex Program Delivery**: Led large-scale SAP S/4HANA transformations, RISE with SAP migrations, cloud infrastructure modernization, and greenfield offshore delivery builds (e.g., onboarding an oil & gas client with 35+ person team in India)

My background includes 7+ years at IBM managing SAP AMS and upgrade programs across global stakeholders, and early-career SAP Basis expertise at Accenture and Mahindra Satyam — giving me hands-on technical depth that informs executive decision-making. I hold certifications in Professional Agile Leadership (PAL I), PRINCE2 Agile, SAP HANA, and SAP Activate, and actively apply Gen-AI / agentic AI to operational workflows (agent orchestration, incident triage copilots, workforce optimization models).

I would welcome the opportunity to discuss how my experience in strategic IT management, financial governance, and global delivery leadership can contribute to Cummins' technology roadmap and the Pune team's success.

Thank you for your consideration.

Sincerely,
Mayur Kachare
